

Amendments to the Claims:

The listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

Claim 1 (Original) A device for treating fabrics in a tumble dryer comprising a reservoir for storing a fabric treatment composition and transfer means to expose fabric treatment composition from the reservoir to airflow generated inside the tumble drier and/or to directly contact fabrics in the dryer, thereby transferring a portion of the fabric treatment composition into contact with fabrics in the tumble dryer during a tumble drying cycle; characterised in that the transfer means comprises compressed foam.

Claim 2 (Original) A device according to claim 1 wherein the compressed foam is in the form of one or more layers.

Claim 3 (Original) A device according to claim 1 wherein the foam is compressed prior to fitting in the device.

Claim 4 (Original) A device according to claim 1 wherein the compressed foam is a polyurethane foam.

Claim 5 (Original) A device according to claim 1 where the compressed foam is a polyester foam.

Claim 6 (Original) A device according to claim 1 wherein the compressed foam has a compression ratio of 8 or more, i.e. it has been compressed to 1/8 or less than its original thickness.

Claim 7 (Original) A device according to claim 1 where the compression ratio of the compressed foam is 10 or more.

Claim 8 (Original) A device according to claim 1 wherein the compression ratio of the compressed foam is 12.

Claim 9 (Original) A device according to claim 1 wherein the compression ratio of the compressed foam is 14.

Claim 10 (Original) A device according to claim 1 wherein the initial (pre-compression) pore size of the foam is 120 or less.

Claim 11 (Original) A device according to claim 1 wherein the initial (pre-compression) pore size of the foam is 100 or less.

Claim 12 (Original) A device according to claim 1 wherein the initial (pre-compression) pore size of the foam is 90 or less.

Claim 13 (Original) A device according to claim 1 wherein the initial (pre-compression) pore size of the foam is 80 or less.

Claim 14 (Original) A device according to claim 1 wherein the initial (pre-compression) pore size of the foam is 60 or less.

Claim 15 (Original) A device according to claim 1 wherein the transfer means comprises at least one outer layer of compressed foam and at least one inner flow control member.

Claim 16 (Currently Amended) A method of treating fabrics in a tumble dryer during multiple tumble drying cycles comprising attaching a device according to ~~any preceding~~

~~claim~~claim 1 to the inside of a tumble dryer door and carrying out a tumble drying process with fabrics inside the tumble dryer.

Claim 17 (Original) A method according to claim 16 in which the tumble drier is operated to achieve an elevated temperature of up to 100°C.

Claim 18 (Original) A method according to claim 16 in which the tumble drier is operated to achieve a temperature in the range 30°C to 80°C.

Claim 19 (Original) A kit comprising a device according to claim 16 in combination with a fabric treatment composition optionally provided in a reservoir for use with said device.

Claim 20 (Original) A tumble dryer which has attached therein a device for treating fabrics in a tumble dryer comprising a reservoir for storing a fabric treatment composition and transfer means to expose fabric treatment composition from the reservoir to airflow generated inside the tumble drier and/or to directly contact fabrics in the dryer, thereby transferring a portion of the fabric treatment composition into contact with fabrics in the tumble dryer during a tumble drying cycle; characterised in that the transfer means comprises compressed foam.

Claim 21 (Original) A reservoir for use with a device for treating fabrics in a tumble dryer comprising a reservoir for storing a fabric treatment composition and transfer means to expose fabric treatment composition from the reservoir to airflow generated inside the tumble drier and/or to directly contact fabrics in the dryer, thereby transferring a portion of the fabric treatment composition into contact with fabrics in the tumble dryer during a tumble drying cycle; characterised in that the transfer means comprises compressed foam.

Claim 22 (Original) A reservoir according to claim 22 comprising a body formed from three or more substantially crescent or segment shaped faces.

Claim 23 (Original) A device substantially as hereinbefore described with reference to and/or as illustrated in the accompanying drawings.

Claim 24 (Original) A method substantially as hereinbefore described with reference to and or as illustrated in the accompanying drawings.
